

SETTING THE TONE

One of the first things your guests will notice at your reception is the decor and your tablescape. Beautifully and tastefully decorated, it can take your wedding from nice to outstanding which will set the entire tone. Match your table design according to your taste and theme. Do you prefer modern, romantic, or casual? Pick a style that will create the ambience you wish to achieve for your wedding and watch your guests be amazed.

CHIC & MOD

Fresh and contemporary, a table full of vivid patterns creates an exciting look. The striking contrast of the lime green against the creamy white blooms has a pop art effect, while a centerpiece featuring flowers of varying heights makes for an interesting focal point. Nothing says mod more than the geometric pattern on the black and white tablecloth, which pulls the whole look together.

Sticking to the colors of the theme, a menu card printed in lime green and featuring the same mod pattern of the tablecloth is resting on a dramatic black dinner plate. For more visual appeal, silverware with an interesting coil design is used.

Advice from the bride:

Elizabeth stresses the importance of family and friends at a wedding. She says, "Most people are going to have a fun time no matter what you do. It's about the people, it's about seeing friends and family... a community feeling is what it's all about."

The groom's cake represented Paul's business of private aviation.

Sparklers and barrel matchbooks added to the fun reception festivities.
